About Me

I'm Reham Ibrahim Al-mashhrawi

A Graphic and Multimedia Designer

I hold a Bachelor's degree in Graphic Design and Multimedia from Imam Mohammad Ibn Saud Islamic University, graduating with First Class Honors. I have over three years of experience in graphic design, gained through volunteer work and freelance projects. My experience includes visual identity design, illustration, UI/UX, 3D design, packaging, and presentation design, enabling me to develop creative solutions across different mediums. I work effectively within teams and have the ability to collaborate and lead creative projects.

Graduation Project

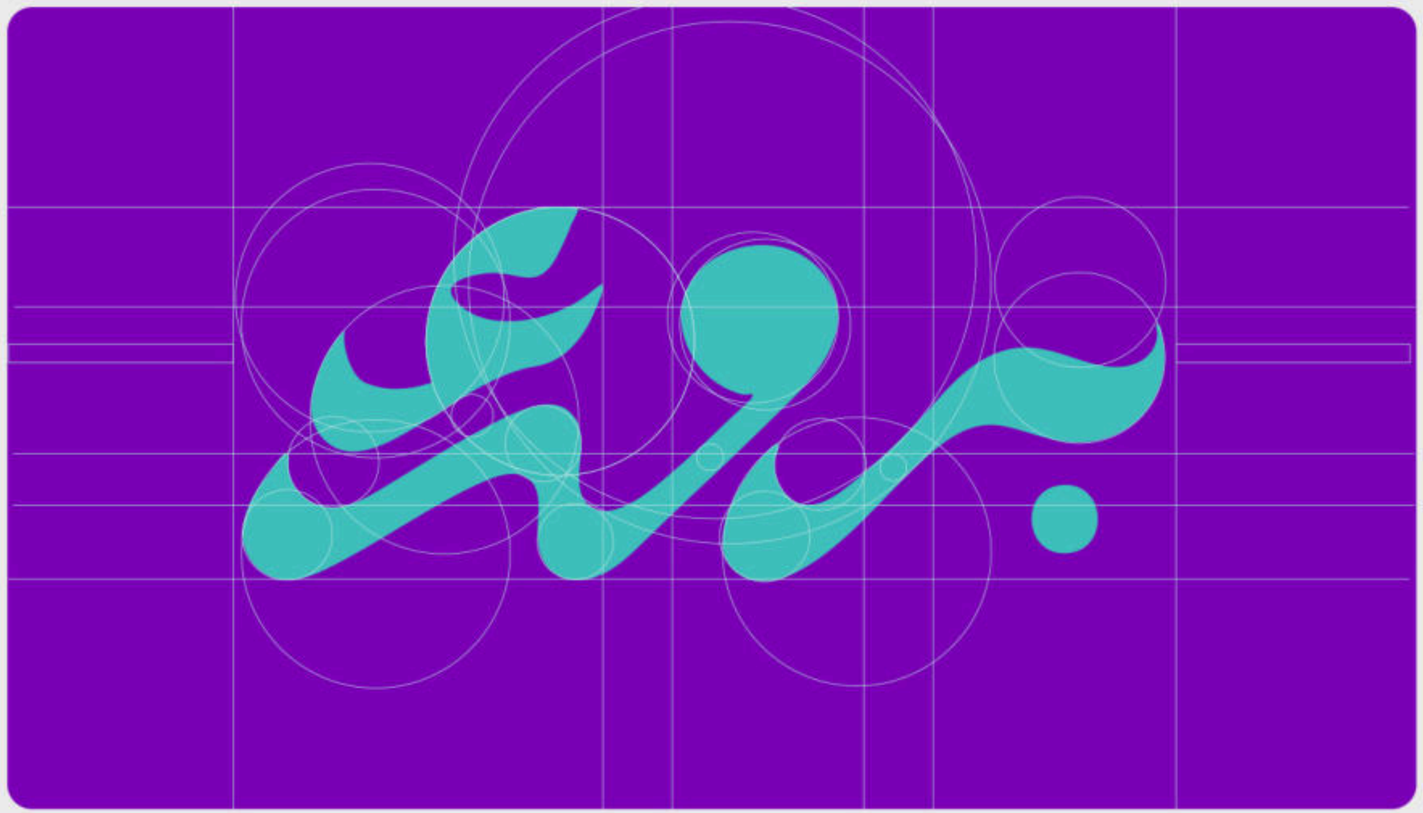

Buroo - 2025

"Buroo" is a medical tourism project that aims to enhance medical tourism in Saudi Arabia by highlighting natural locations with therapeutic properties.The project is presented as an interactive mobile application supported by an AI-powered guide that helps users choose suitable destinations and personalized healing programs, while promoting sustainability through local community involvement. Developed with three of my colleagues: Haya Alhamwi, Baidaa Alobaid, and Elaf Almutairi.

02 Branding

Zawayat Almaather - 2025

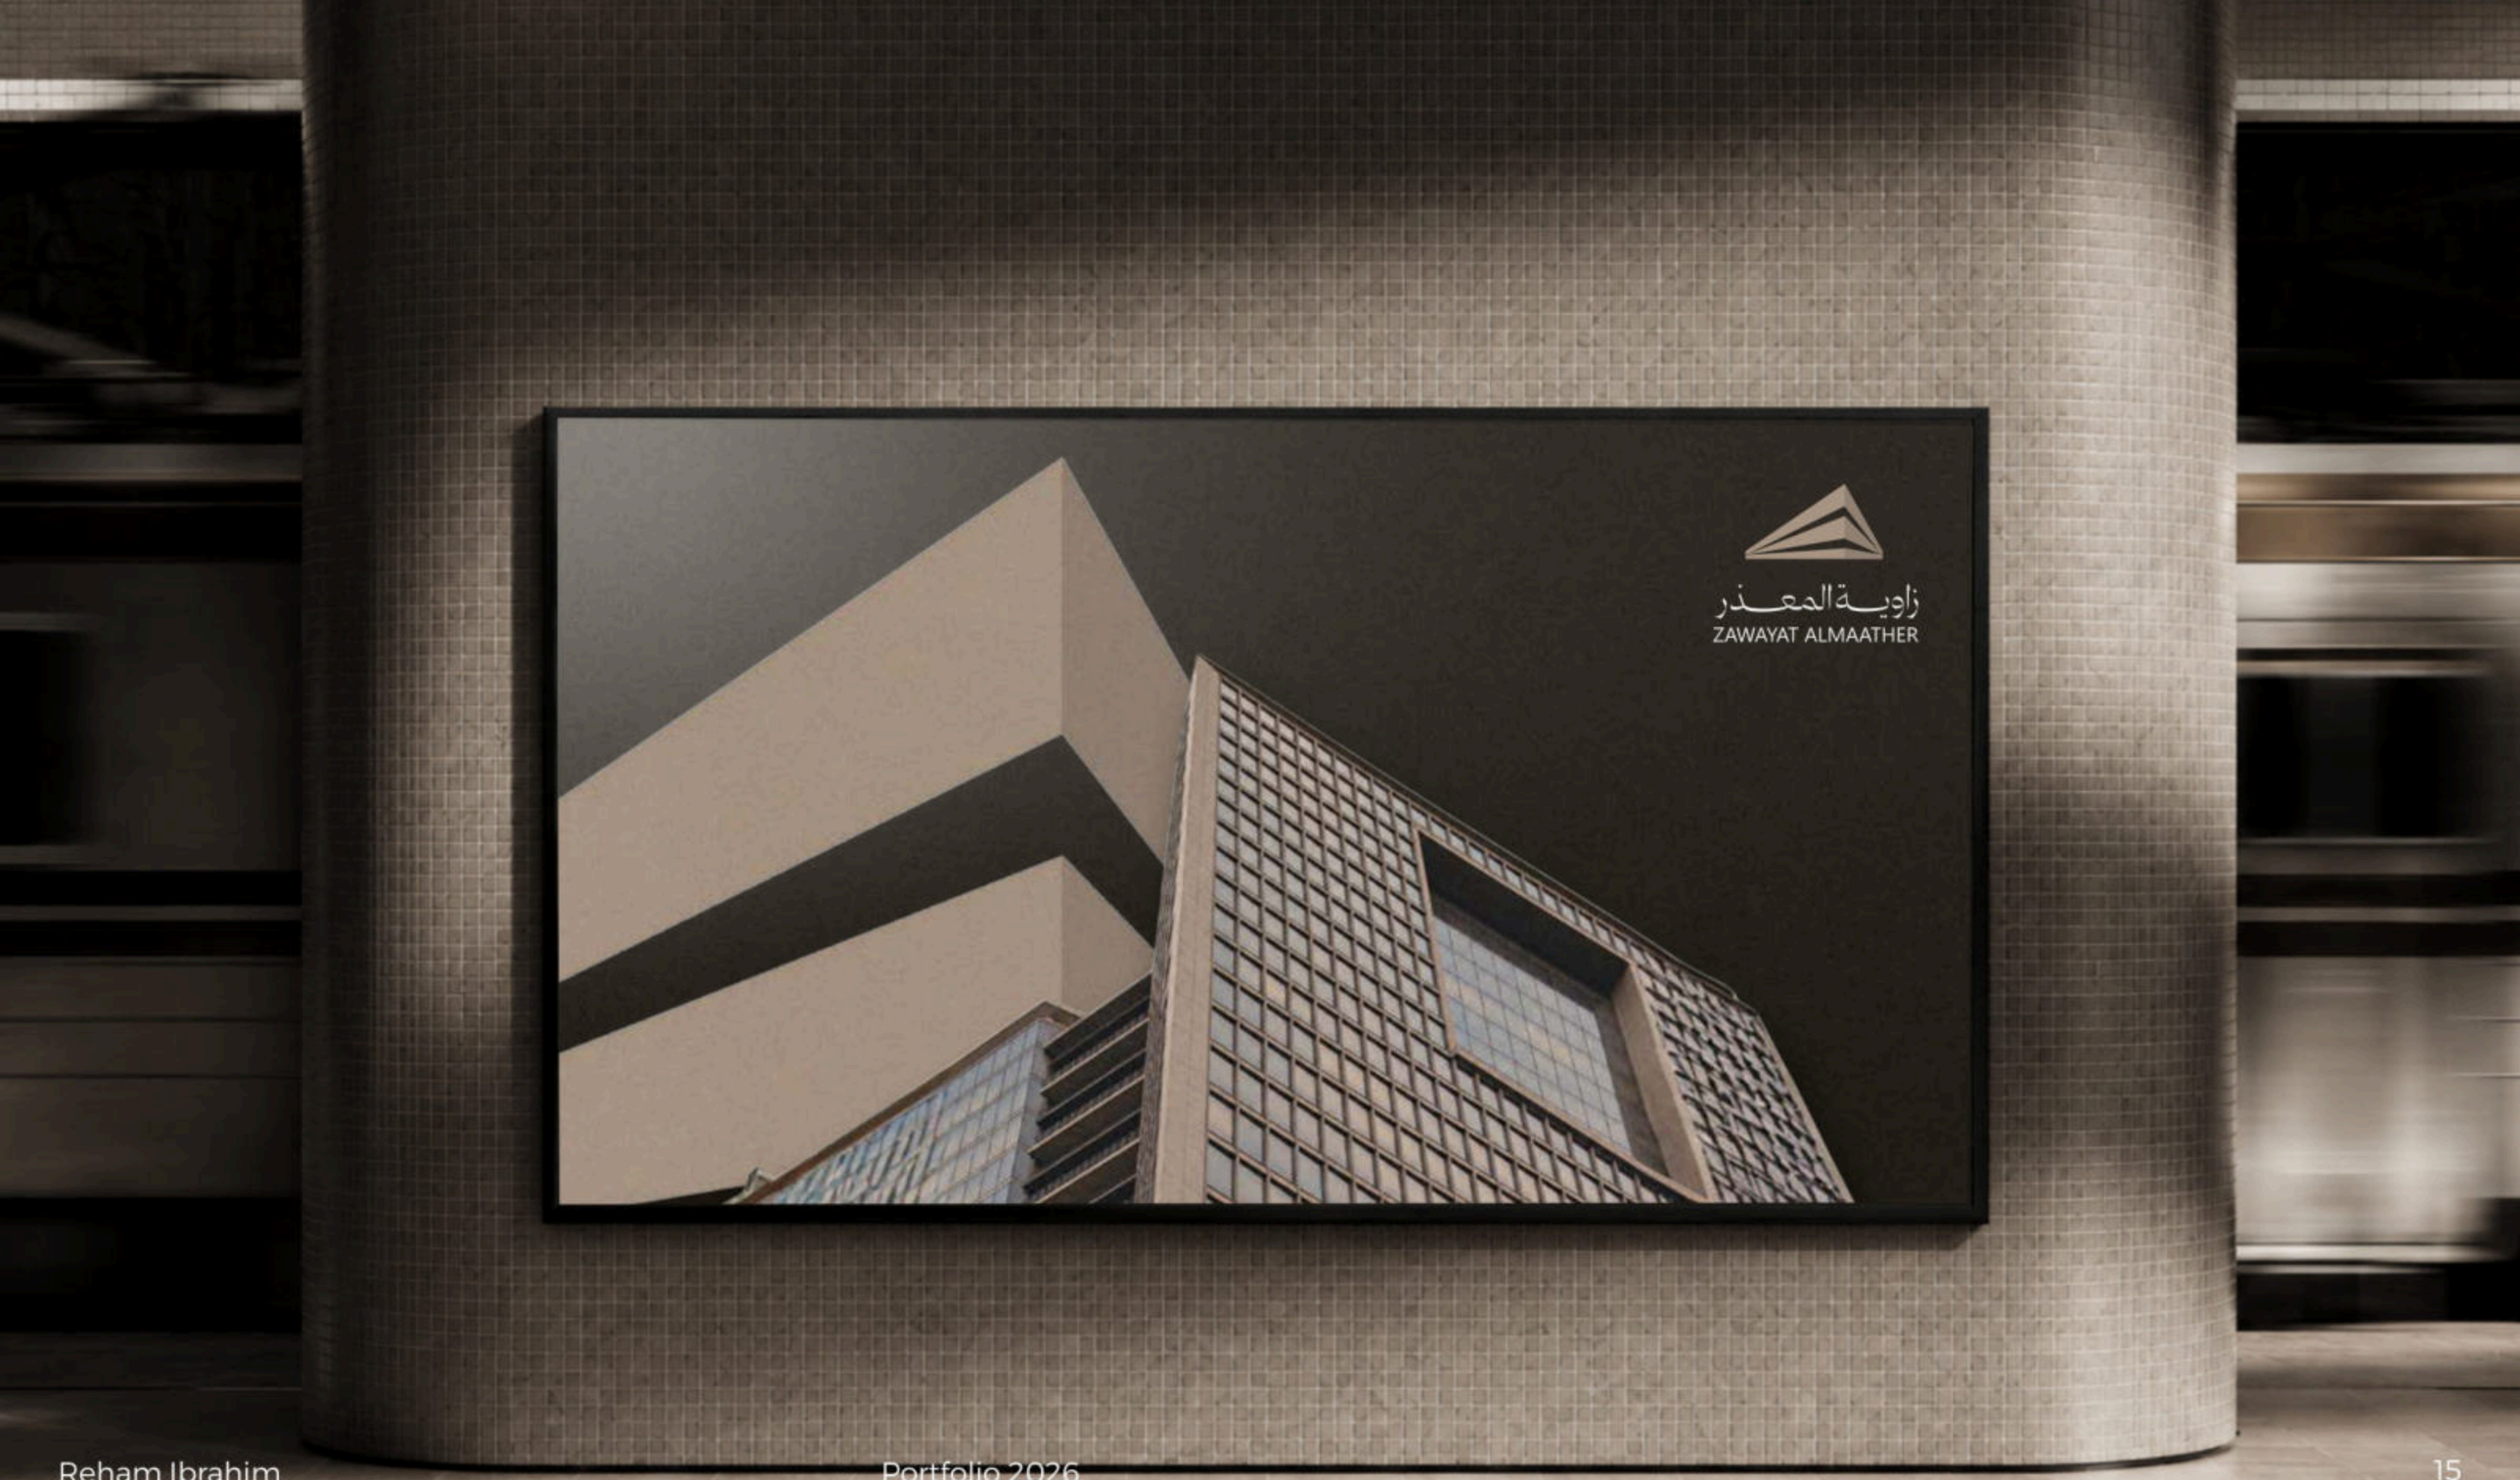

The identity was inspired by Zawayat Almaather and the concept of place and the corner, reflecting the brand's nature as a real estate company.
Earthy tones were chosen to express warmth, authenticity, and a connection to place, while preserving the original logo and subtly refining its typography, colors, and corner details.
The goal was to evolve the identity without losing its original character, creating a more modern and clear look that reflects the real estate brand.

رَمَق

RAMAQ

Ramaq - 2026

Ramaq is a visual identity design exploration inspired by Arab heritage collectibles, created as an exercise in typography and logo design. The name Ramaq comes from the meaning of a fleeting glance, reflecting how certain pieces capture attention at first sight while carrying cultural value and a story of their own. The visual identity draws inspiration from the warm tones of clay, gold, and ivory, with a typographic logo that combines Arabic character with a contemporary aesthetic.

cpo - 2024

A visual identity and comprehensive rebranding were developed for CPO Company, a prosthetics specialist affiliated with MCA, reflecting its vision, core values, and modern approach in a professional and cohesive manner. The previous logo was redesigned with more distinctive and vibrant colors, incorporating authentic design elements that symbolize determination, readiness, and the drive to move forward with strength. The overall design achieves a smooth, balanced, and harmonious appearance, ensuring consistency across all brand applications.

03 Packaging

Baja - 2025

This design is a university project that reimagines the packaging of Baja Deluxe Mixed Nuts after studying competitors and analyzing feedback. The concept introduces a unique gathering box that blends snacking with a fun, interactive group experience, incorporating a playful activity that encourages social interaction and engagement. Inspired by Baja's identity and landmarks from different Saudi regions, the package transforms the traditional nut-eating experience into a more creative and memorable social occasion. Designed to be reusable, the packaging also supports sustainability and aligns with the values of Saudi Vision 2030, offering an alternative to conventional disposable plastic packaging.

Oishi - 2024

This design is a university project that blends traditional Japanese architecture with the sushi dining experience. The packaging is inspired by old Japanese houses, evoking the feeling of eating in an authentic Japanese street.Colors andillustrations draw from Japanese culture, while an inner packaging preserves the sushi, balancing aesthetic appeal with functionality

04 Social Media

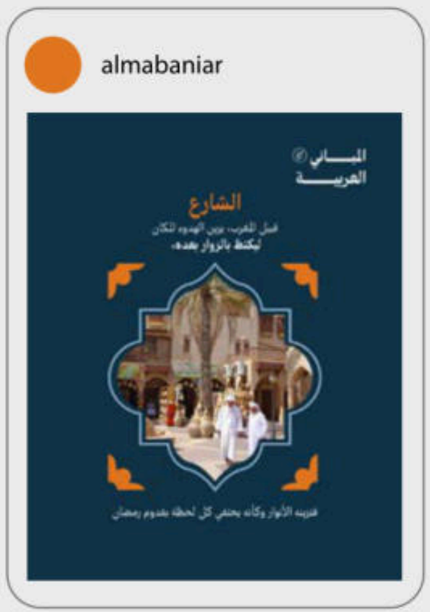

During my internship, I designed social media posts for the Arab buildings affiliated with the Tahaddath Al-Arabiyah brand, ensuring consistency with the brand's visual identity and creating cohesive visual designs.

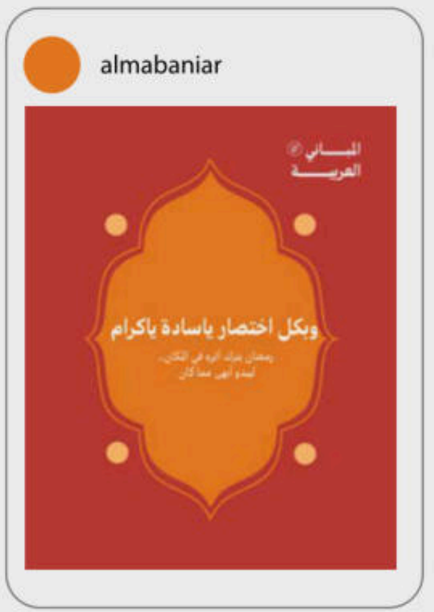

During my internship, I designed social media posts for Darat Trakeeb, creating a variety of designs while maintaining consistency with the brand's visual identity.

عمادة شؤون الطلاب
The Deanship of Student Affairs

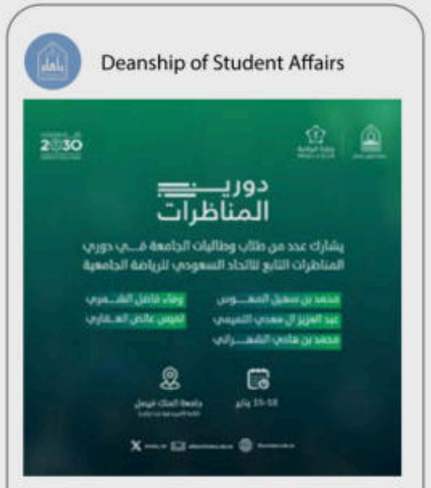

During my university years, I worked as a Student Employment Program designer at the Deanship of Student Affairs, where I designed a variety of social media posts for international days, events, and awareness campaigns while maintaining a cohesive visual identity.

Event & Exhibition Design

TEDx
Imam Mohammad Ibn
Saud Islamic University

Imamu TedX - 2026

I worked as part of the design team for TEDx Imam University, the largest event at Imam Mohammad Ibn Saud Islamic University, under the theme "From A to Z." I created a range of print and digital designs before and after the event, maintaining a cohesive visual identity that reflects the concept of completeness and integration.

تنفّس

Tanafas- 2025

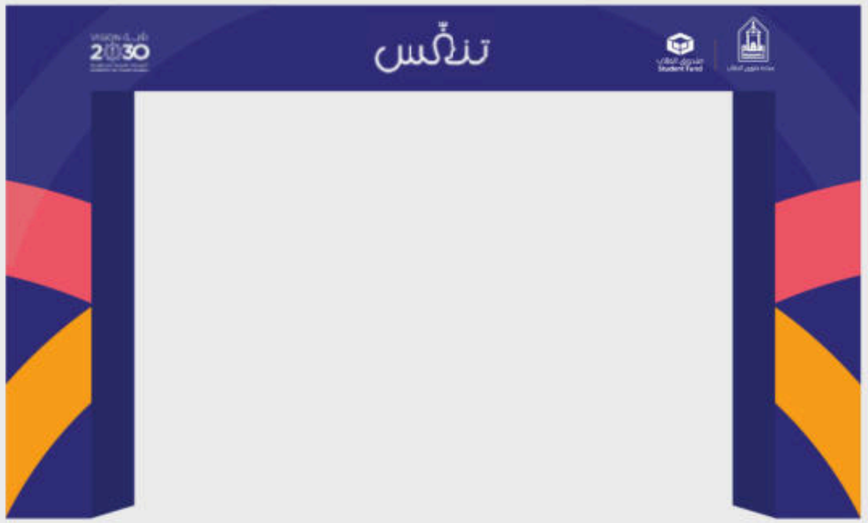

In the third edition of a university event organized by the Deanship of Student Affairs at Imam Muhammad bin Saud Islamic University, I served as the Design Team Leader. I created all visual elements of the event, from diverse print materials to promotional content. The designs focused on delivering a cohesive and engaging identity that enhanced engagement and highlighted the event's presence.

Illustration

mural Design- 2024

I designed a mural for MCA in Al-Asa, which was implemented in real life. The design showcased the identity of Al-Ahsa through elements such as Jabal Al-Qarah, palm trees, and Wadi Al-Batha, using calm colors that reflect the region's heritage and spirit.

Empowering
Mobility

character - 2024

This university project involved designing a character inspired by the cactus to represent a freelance graphic designer. Its features reflect the challenges of independent designers, such as sleepless nights, numerous revisions, and long hours spent working on a laptop, expressed through glasses and a slightly tired look. The character symbolizes resilience, adaptability, perseverance, and the balance between creativity and challenges. A simple comic was also created to illustrate the character's daily life in a light and playful way.

08 3D Design

Island window display - 2025

This collaborative university project, developed with my colleague Haya Alhamwi, focused on designing an island window display featuring a photo booth and a curved wall displaying illustrations inspired by Boulevard World. The design aimed to create a lively and interactive environment for visitors, using striking visual elements to attract attention and encourage interaction while creating harmony between movement and visual communication.

Perspective Design – 2025

For a university project, I designed three illustration works inspired by Boulevard World, using different approaches based on 2, 3, and 5 anchor points for drawing.All designs were unified under a single color palette that reflects the identity of the place, giving the works a cohesive visual style that expresses the spirit of Boulevard World in Riyadh.

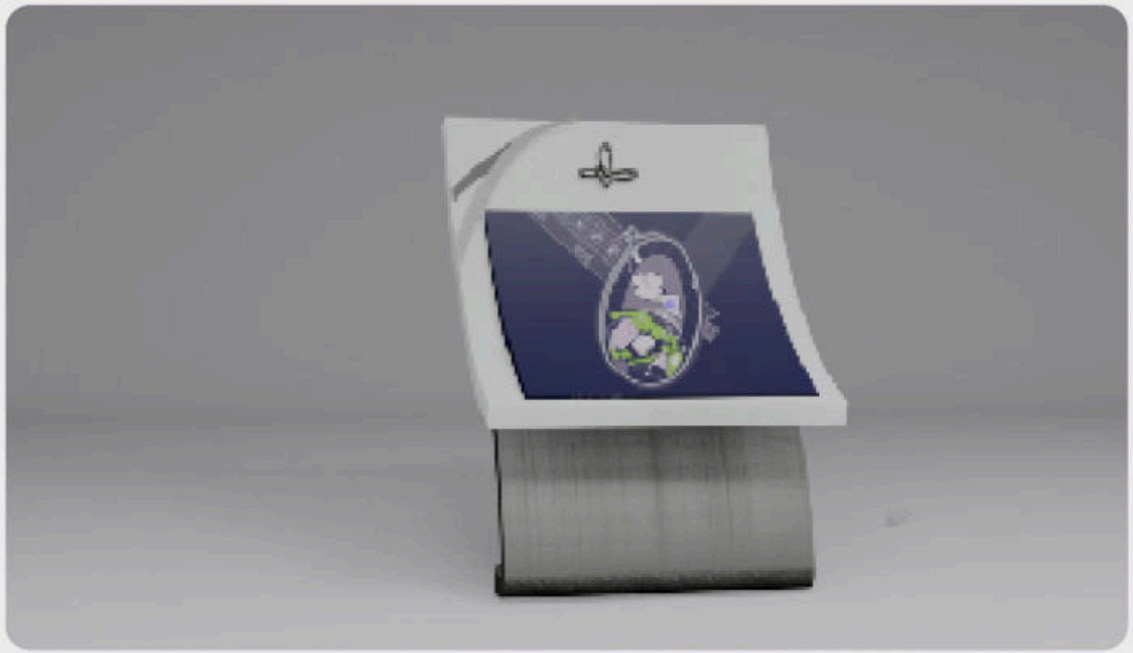

Both Design - 2025

A university project for the “Ethraa” booth aims to transform shopping centers into spaces for reading and knowledge within everyday life. The booth features a carefully curated small library, allowing visitors to read on the spot by borrowing books, redefining the relationship between individuals and culture in a spontaneous and enjoyable way, making literature part of daily public spaces, along with external wayfinding signage designed to indicate its location and help visitors easily find it.

منتزه الملك عبدالله
King Abdullah Park

environment Design- 2025

This university project focuses on designing the environment of King Abdullah Park to create an engaging experience for visitors and tourists, including optimized green spaces, modern seating areas, and pedestrian and cycling paths. Clear 2D wayfinding signage was developed to enhance visitor experience and facilitate navigation within the park.

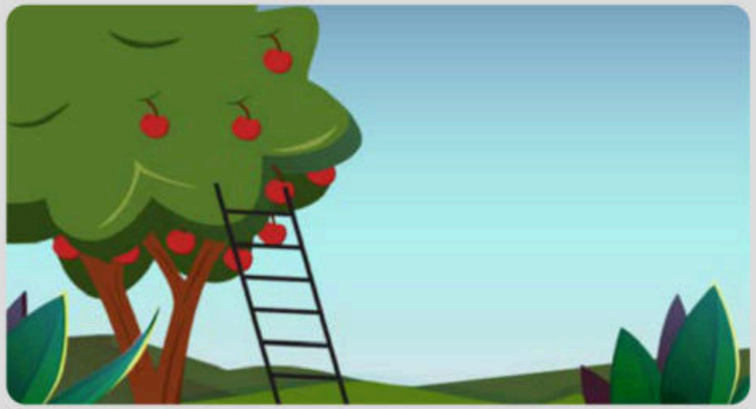

09

Animation

Trailer Design - 2024

A university project redesigning the Tig 'n Seek series trailer to create an engaging experience that amplifies the story's core message. The work involved rethinking the narrative, enhancing character expressions, and crafting dynamic scenes, with all characters and backgrounds personally designed by me. The trailer now balances fun and storytelling, delivering a richer, more vibrant experience that highlights creativity, attention to detail, and visual cohesion.

Trailer Design - 2024

A university project for designing a 2D trailer, developed comprehensively from the script and character design to the voices, scenes, backgrounds, logo, and all visual elements, with the characters and backgrounds entirely created by me. The trailer tells the story of three mischievous students on a journey to discover a magical palm tree located beyond their neighborhood. Their adventure is filled with challenges and excitement, focusing on creating a cohesive visual experience that combines creative storytelling, meticulous detail, and a sense of fun and exploration.

10

UI/UX

Muqtana - 2025

A university project aimed at developing a smart application to enhance the book acquisition experience for reading enthusiasts, by providing search capabilities, personalized recommendations, and personal library organization, in addition to facilitating interaction and engagement within a reading community.
